Arctic Marine Strategic Plan

IMPLEMENTATION PROGRESS REPORT

2015-2017

WORKING DOCUMENT, VERSION 10 FEBRUARY

PAME agreed to the following process/timeline to finalize the 1st AMSP Implementation Report for submission to SAOs and Ministers for information.

- Feb 10: Revised draft version submitted to SAOs for information.
- March-April: Revised based on comments to include links to reports/activities (as relevant) and circulate final draft to PAME, including proposed layout.
- April-May: preparation for release of the document i.e. final layout and printing.

The Arctic Marine Strategic Plan

The Arctic Council's *Arctic Marine Strategic Plan 2015-2025 (AMSP)* was approved in April 2015 at the 9th ministerial meeting in Iqaluit, Canada. It provides a framework to guide its actions to protect Arctic marine and coastal ecosystems and to promote sustainable development.

This Strategic Plan addresses both short-term and long-term challenges and opportunities, through forty Strategic Actions comprised under four Strategic Goals:

- **Goal 1:** Improve knowledge of the Arctic marine environment, and continue to monitor and assess current and future impacts on Arctic marine ecosystems.
- **Goal 2:** Conserve and protect ecosystem function and marine biodiversity to enhance resilience and the provision of ecosystem services.
- **Goal 3:** Promote safe and sustainable use of the marine environment, taking into account cumulative environmental impacts.
- **Goal 4:** Enhance the economic, social and cultural well-being of Arctic inhabitants, including Arctic indigenous peoples and strengthen their capacity to adapt to changes in the Arctic marine environment.

AMSP Implementation plan

The AMSP Implementation Plan was approved at PAME I-2016 meeting. The aim is to provide a structured approach that tracks follow-up activities (new and ongoing) of its forty strategic actions over the next 10 years among the Arctic Council working groups with overall guidance from the SAOs. This progress report enlists progress of the Arctic Council Working Groups. It is intended to be a living document, updated regularly for an overview of work by the Arctic Council.

TRACKING PROGRESS OF STRATEGIC ACTIONS – matrix

No.	Strategic Action	Follow up/Implementation
Goal 1: Improve knowledge of the Arctic marine environment, and continue to monitor and assess current and future impacts on Arctic marine ecosystems.		
7.1.1	<p><i>Strengthen scientific cooperation and joint monitoring among the Arctic states, and with other states, organizations and stakeholders involved in Arctic research or traditional and local knowledge,-with a focus on prioritizing research issues, filling knowledge gaps, and developing mechanisms to share and exchange observational data.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Arctic Ship Traffic Data project (ASTD): A proposed system for maritime traffic analysis <hr/> <p>SDWG</p> <ul style="list-style-type: none"> ✓ SDWG’s SECEG participation in MEMA ✓ Arctic Adaptation Exchange Portal ✓ Arctic EIA <hr/> <p>AMAP</p> <ul style="list-style-type: none"> ✓ Through the AMAP monitoring programme and SAON <hr/> <p>EPPR</p> <ul style="list-style-type: none"> ✓ Arctic Oil Spill Response Technology Workshop <hr/> <p>CAFF</p> <p>Implementing the recommendations of the Arctic Biodiversity Assessment (ABA) contains a range of actions which respond to many of the AMSP strategic actions, including but not limited to:</p> <ul style="list-style-type: none"> ✓ Implementation of the Circumpolar Marine Biodiversity Monitoring Plan ✓ Development of the Coastal Biodiversity Monitoring Plan ✓ The State of the Arctic Marine Biodiversity Report (SAMBR) ✓ Arctic Biodiversity Data Service (ABDS) ✓ CAFFs cooperation with the Arctic Spatial Data Infrastructure (SDI) ✓ A report on Traditional Knowledge and Wisdom: Changes in the North American Arctic and the involvement of northern communities ✓ TK holders in the development of the CBMP Arctic Coastal Biodiversity Monitoring Plan.
7.1.2	<p><i>Improve, synthesize, and respond to emerging knowledge across all disciplines and sectors to include government, academic and industry information, and traditional and local knowledge.</i></p>	<p>SDWG</p> <ul style="list-style-type: none"> ✓ ECONOR III ✓ Arctic Renewable Energy Atlas (AREA) <hr/> <p>AMAP</p> <ul style="list-style-type: none"> ✓ Through the AMAP Monitoring Programme. This is the ambition of AACAA. <hr/> <p>EPPR</p> <ul style="list-style-type: none"> ✓ Conditions on Oil Spill Circumpolar Response Viability Analysis

No.	Strategic Action	Follow up/Implementation
		<p>CAFF</p> <ul style="list-style-type: none"> ✓ Numerous recommendations and actions from the Arctic Biodiversity Assessment. To promote the conservation and sustainable use of Arctic biodiversity through dialogue among scientists, policy-makers, government officials, industry, civil society and indigenous peoples. The second Congress is scheduled for 2018, Finland. Also see points under 7.1.1
7.1.3	<p><i>Improve the understanding of cumulative impacts on marine ecosystems from multiple human activity-induced stressors such as climate change, ocean acidification, local and long range transported pollution (land and sea-based), marine litter, noise, eutrophication, biomass overharvesting, invasive alien species and other threats.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Status of EA implementation Report (EA-EG) ✓ Arctic Invasive Alien Species Strategy and Action plan (ARIAS) in collaboration with CAFF <p>SDWG</p> <ul style="list-style-type: none"> ✓ One Health ✓ Arctic EIA <p>AMAP</p> <ul style="list-style-type: none"> ✓ This is the ambition of AACA. It is supported by the AMAP Monitoring Programme and assessment activities like AOA. <p>ACAP</p> <ul style="list-style-type: none"> ✓ Phase out of ozone-depleting and fluorinated greenhouse gases at one of the fish and seafood processing factories of the Murmansk Oblast ✓ Pilot project for reducing CO2 and black carbon emissions on the rivers of the Arctic zone of the Russian Federation <p>CAFF</p> <ul style="list-style-type: none"> ✓ Numerous recommendations and actions from the Arctic Biodiversity Assessment. ✓ Arctic Invasive Alien Species Strategy and Action plan (ARIAS) ✓ The State of the Arctic Marine Biodiversity Report from CAFFs CBMP
7.1.4	<p><i>Improve the predictive capacity and develop a common understanding of the likely future impacts of climate change and other emerging threats, such as ocean acidification.</i></p>	<p>SDWG</p> <ul style="list-style-type: none"> ✓ Arctic EIA <p>AMAP</p> <ul style="list-style-type: none"> ✓ This is the ambition of AACA. It is supported by the AMAP Monitoring Programme and assessment activities like AOA <p>CAFF</p> <ul style="list-style-type: none"> ✓ Numerous recommendations and actions from the Arctic Biodiversity Assessment. ✓ CAFFs cooperation with the Arctic Spatial Data Infrastructure (SDI)

No.	Strategic Action	Follow up/Implementation
7.1.5	<p><i>Enhance local involvement in the collection of information and monitoring of the marine environment including by using traditional and local knowledge in the work of the Arctic Council.</i></p>	<p>SDWG</p> <ul style="list-style-type: none"> ✓ One Health ✓ Arctic Adaptation Exchange Portal ✓ Arctic as a Food Producing Region
		<p>AMAP</p> <ul style="list-style-type: none"> ✓ This is supported by the AMAP Monitoring Programme (when relevant) and is the ambition of SAON
		<p>EPPR</p> <ul style="list-style-type: none"> ✓ Prevention, Preparedness and Response for Small Communities (focusing on oil spill response)
		<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ A report on Traditional Knowledge and Wisdom: Changes in the North American Arctic and the involvement of northern communities ✓ TK holders in the development of the CBMP Arctic Coastal Biodiversity Monitoring Plan. ✓ CAFF's educational kits
7.1.6	<p><i>Improve and coordinate communication of knowledge generated in Arctic Council assessments to the circumpolar and global community.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Collaboration with international organizations on Arctic related activities of common interest
		<p>SDWG</p> <ul style="list-style-type: none"> ✓ ECONOR III
		<p>AMAP</p> <ul style="list-style-type: none"> ✓ This is the ambition of AMAP assessment work and in particular of AACA
		<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ CAFF's framework of Resolution of Cooperation with relevant biodiversity related multi-lateral environmental agreements and bodies (CBD, Ramsar, AEWA, CMS). ✓ CAFF's Arctic Biodiversity Data Service (ABDS)
7.1.7	<p><i>Continue the development and standardizing of data sharing and management at a circumpolar level.</i></p>	<p>SDWG</p> <ul style="list-style-type: none"> ✓ ECONOR III
		<p>AMAP</p> <ul style="list-style-type: none"> ✓ This is the ambition of SAON and in particular the Arctic Data Committee

No.	Strategic Action	Follow up/Implementation
		<p>EPPR</p> <ul style="list-style-type: none"> ✓ Standardization as a tool for prevention of oil spills in the Arctic <p>CAFF</p> <ul style="list-style-type: none"> ✓ See previous entries regarding CBMP and ANDS
7.1.8	<p><i>Improve awareness of Arctic shipping activity and its impacts, promote expanded information sharing of ship traffic data among Arctic states and, as appropriate, other stakeholders, and update selected parts of the 2009 Arctic Marine Shipping Assessment (AMSA) Report, including those pertaining to the volume, composition and destination of Arctic shipping, shipping impacts, and key infrastructure needs such as hydrographic surveying and nautical charting.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ The identification of a project for PAME to report on Polar Code implementation, Port States Control Regime statistics on ship compliance, and challenges, if any, in observing the Polar Code ✓ Regular updates on the work of the IMO with respect to black carbon ✓ Arctic Ship Traffic Data project (ASTD): A proposed system for maritime traffic analysis <p>AMAP</p> <ul style="list-style-type: none"> ✓ Adaptation Actions for a Changing Arctic (AACA) <p>EPPR</p> <ul style="list-style-type: none"> ✓ Development of a Database of Arctic Response Assets ✓ Initial engagement (IALA)
7.1.9	<p><i>Strengthen, where feasible, the collection, observation, monitoring and dissemination of relevant data on the Arctic marine environment. This could include hydrographic and bathymetric data; oceanographic data (including tides and currents) and meteorological information for numerical modeling and forecasting; pollutants; climate change-related impacts (especially ocean acidification); and ecosystem and biodiversity status and trends (including invasive species and other metrics of environmental change).</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Arctic Ship Traffic Data project (ASTD): A proposed system for maritime traffic analysis <p>SDWG</p> <ul style="list-style-type: none"> ✓ Arctic Adaptation Exchange Portal <p>AMAP</p> <ul style="list-style-type: none"> ✓ Part of this is the ambition of AACA. It is supported by the AMAP Monitoring Programme and assessment activities like AOA <p>EPPR</p> <ul style="list-style-type: none"> ✓ Conditions on Oil Spill Circumpolar Response Viability Analysis <p>CAFF</p> <ul style="list-style-type: none"> ✓ See earlier entries re ABDS and CBMP, and CAFFs data agreements with GBIF and OBIS

No.	Strategic Action	Follow up/Implementation
7.1.10	<p><i>Strengthen the development of circumpolar procedures for, and improve remote sensing capabilities to support, ice detection, monitoring, and forecasting and improve the provision of near-shore and off-shore ice information (current and forecast conditions).</i></p>	<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ the Land Cover Change Index ✓ (SAON – The indicators’s work. It is in a very premature phase) ✓ See earlier note on CBMP suite of indicators under 7.1.9 and 7.1.9 <p>EPPR</p> <ul style="list-style-type: none"> ✓ Initial engagement - International Ice Charting Working Group (IICWG)
7.1.11	<p><i>Support continued development of circumpolar indicators of changes and stressors across the Arctic marine environment, as well as metrics for monitoring biodiversity.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ PAME has worked jointly with CAFF on finalizing the Arctic Protected Areas: Indicator Report and the release of the harmonized dataset based on data received from Member States. <p>AMAP</p> <ul style="list-style-type: none"> ✓ Adaptation Actions for a Changing Arctic (AACA) project.
<p>Goal 2: Conserve and protect ecosystem function and marine biodiversity to enhance resilience and the provision of ecosystem services.</p>		
7.2.1	<p><i>Promote the implementation of the ecosystem approach to management in the Arctic through synthesis and application of the results of relevant work by the Arctic Council and associated efforts by relevant organizations.</i></p>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Status of implementation of the Ecosystem Approach to management (EA-EG) ✓ Conference report from the International science and policy conference on the status of implementation in the Arctic (August 2016) ✓ White paper: Status of Setting Ecological Objectives in the Arctic ✓ Work of the joint ICES/PAME working group <p>SDWG</p> <ul style="list-style-type: none"> ✓ Arctic EIA <p>AMAP</p> <ul style="list-style-type: none"> ✓ Part of this could be the in scope of the Central Arctic Ocean assessment <p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ The ecosystem approach is fundamental to CSFF’s mandate and promoting its use and application including support to AC cross-cutting efforts e.g. EA expert group is reflected in the CAFF work plan.

No.	Strategic Action	Follow up/Implementation
7.2.2	<i>Identify and assess threats and impacts to areas of heightened ecological and cultural significance and how such areas may be influenced in the future by climate change and other human induced changes and activities.</i>	<p>AMAP</p> <ul style="list-style-type: none"> ✓ AOA may identify and assess such areas <p>ACAP</p> <ul style="list-style-type: none"> ✓ Circumpolar Local Environmental Observer (CLEO) <p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment.
7.2.3	<i>Identify and develop tools and methodologies for assessing cumulative impacts and risks for Arctic marine ecosystems and areas of heightened ecological and cultural significance with the aim of using them for integrated assessments.</i>	<p>SDWG</p> <ul style="list-style-type: none"> ✓ Arctic EIA <p>AMAP</p> <ul style="list-style-type: none"> ✓ AMAP monitoring and assessment work, including the Adaptation Actions for a Changing Arctic (AACA) project. <p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ See earlier notes to CBMP, and ABDS ✓ Participation in the PAME led EA expert group ✓ As part of its support to the CBD work to identify EBSAs in the Arctic CAFF has processed and made accessible via the ABDS the data collected by the CBD for its work to identify EBSAs in the Arctic
7.2.4	<i>Encourage the Arctic states to implement appropriate measures, – or to pursue such measures at relevant international organizations to protect Arctic Marine Areas of Heightened Ecological and Cultural Significance. Focus should be on species and ecosystems particularly at risk from climate change and cumulative impacts, including areas of refuge for ice-associated species that are, or are expected to become particularly important to Arctic marine biodiversity under future climate conditions.</i>	<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment.
7.2.5	<i>Develop and encourage the Arctic states to implement common measures and support</i>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Arctic invasive species strategy and action plan (in collaboration with CAFF)

No.	Strategic Action	Follow up/Implementation
	<i>research into technology and techniques for early detection and reporting of marine invasive species in the Arctic marine environment.</i>	<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ Arctic invasive species strategy and action plan
7.2.6	<i>Identify and map areas of the marine environment that are particularly vulnerable to the effects of ocean acidification to inform appropriate monitoring and adaptation measures.</i>	<p>AMAP</p> <ul style="list-style-type: none"> ✓ AOA may identify and assess such areas
7.2.7	<i>Promote cooperation among Arctic and non-Arctic states to address threats to the staging and wintering grounds and migrating corridors of migratory species using the marine environment.</i>	<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment. ✓ Arctic Migratory Bird Initiative (AMBI)
7.2.8	<i>Actively support efforts, in cooperation with indigenous peoples, to: reduce long range pollution accumulating in the Arctic marine food-chains, and; address climate change and ocean acidification by reducing emissions and implementing adaptation measures, as a matter of urgency.</i>	<p>AMAP</p> <ul style="list-style-type: none"> ✓ AMAP monitoring and assessment work, including the Adaptation Actions for a Changing Arctic (AACA) project.
		<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment.
7.2.9	<i>Limit the impacts of climate change in the short term through concerted efforts to create inventories of and reduce emissions of short lived climate forcers, in particular black carbon and methane.</i>	<p>AMAP</p> <ul style="list-style-type: none"> ✓ AMAP monitoring and assessment work, including the Adaptation Actions for a Changing Arctic (AACA) project.
		<p>ACAP</p> <ul style="list-style-type: none"> ✓ A number of projects that deal with black carbon reduction, not directly marine related
		<p>CAFF</p> <ul style="list-style-type: none"> ✓ Recommendations and actions from the Arctic Biodiversity Assessment.
7.2.10	<i>Develop a pan-Arctic network of marine protected areas, based on the best available knowledge, to strengthen marine ecosystem</i>	<p>PAME</p> <ul style="list-style-type: none"> ✓ Framework for a Pan-Arctic Network of MPAs follow-up activities: <ul style="list-style-type: none"> ○ A report in support of the “Desktop study on area-based conservation measures and its linkages to categories of Arctic
